

Test Form Submission, PHP Session Values, and PHP Error Reporting Script

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Useful tool to detect errors with PHP coding, session variables, and html form submissions. This is entirely the work of others, but brings together in a simple PHP script the ability to test HTML form submissions, PHP session variables, and all PHP error reporting.
