

# TextCounter (C++ Version)

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

TextCounter requires Server Side Includes and will display a text count of the number of visitors to a page in your web site. TextCounter includes options such as 0 padding numbers, file locking, linking from the count, displaying the date from when the count began and more. It works on multiple pages and allows you to restrict accesses to certain parts of your server.
