

# The Address Book Reloaded

|                       |                        |
|-----------------------|------------------------|
| <b>Address</b>        | {value_address}        |
| <b>Contact Person</b> | {value_contact_person} |
| <b>Mobile Number</b>  | {value_mobile_number}  |
| <b>Email</b>          | {value_email}          |

This is a PHP addressbook web application to store contact details of employees/customers in utf8 format on an intranet or website. Features: login/user accounts, email harvesting protection, Google Maps, distributed management of contacts, PDF address book generation, plugins, styles, SSL-Certificate authority management. Stores portraits of contacts, addresses, emails, phones, VoIP/sip, webs, mms and media info, occupation, function, projects and free style info as HTML notes. URI links for automatic VoIP dialing with skype or sip clients. Requirements: Webserver with PHP >=4.1 or 5 support, MySQL >= V4.1 as server, Firefox or IE as client. This is occasionally a Top 100 project at sourceforge. Visit the demo at: <http://tab-2.sourceforge.net> (but be patient with the sourceforge servers some errors occur with non delivered files or session info)
