

The Knowledgebase

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This is a tool to help you build a knowledgebase on your Web site. The knowledgebase is organized into various topics. Users ask questions pertaining to certain topics. The questions/answers are browsable by keywords. The data is stored in a relational database - MySQL. It requires Apache with PHP3 and MySQL to use this tool. Different users have different privileges: Certain users can only ask questions and browse answers, Some can answer questions and The administrators can delete irrelevant questions, assign privileges to users etc.
