

The Python Web Services Developer, Part 2

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This is the beginning of a short series on creating a software repository system built on Web services and developed in the Python programming language. This article shows you the details of using the 4Suite open-source XML server with Python to create Web service-based applications.
