The Rating Game

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This CGI script demonstrations a way of rating Web pages automatically for information content. Once a user enters a full URL in the text field and press Rate, after some processing, the script will report a variety of rating indexes. Since some sites customize themselves according to browser, you can impersonate various browsers to see how the ratings change.
