ThreeDimView

Address   {value_address}
Contact Person   {value_contact_person}
Mobile Number   {value_mobile_number}
Email   {value_email}

This Java applet implements a color three-D object viewer with wireframe and shaded options. Simple back-face culling, depth cueing, and z-buffer for hidden surface removal are used. Several parameters are provided, including initial position, spinning mode, displaying mode, scale, overall transparency, etc.
