Mobile Number	{value_mobile_number}
Email	{value_email}

Multiplex & Multi-location Ticket Booking Software is a seating reservation script like tickets for cinema, theater, events the was developed in PHP/MySQL and also it's flexible and customizable. You can add an unlimited number of movies, Theaters, Events or concerts. We have tools to manage seating layouts, screening location so you can create a seat layout for each cinema/theater hall and set different ticket types and prices such as First class and Second class. The Admin and the Back Office module has options to configure the complete functionality of the product that includes setting up cut-off times, adding service charges for advance bookings, seat blocking time to avoid the concurrent booking, generate the coupon code and the detailed booking report.
