<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

TigerTom's Affiliate Program Software (TTAPS) is an easy set up, with some surprising features. MySQL is not needed; it uses flat files. It's two-tier. Affiliates can have a choice of webpages on your site to redirect to; this increases the chances of sales. Designed for low server resource usage, while being easy to maintain.
