

# Time Tracking Calendar

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This PHP software was designed to provide everyone with a calendar and associated tasks with each day. This software also will allow for Calendar administrators to manage users based on groups. For example the tech group could include a number of users, which are all assigned a mandatory 40-hour a week schedule. The software allows administrators to generate reports based on individuals and group to see how much time they are spending on particular task. Software is 100% free! See web site for free download and more details on features.
