TimelyWeb

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

TimelyWeb helps you track updates of web pages and ftp resources. When the change is detected, you can be notified in a number of ways including e-mail, SMS or instant messenger message. TimelyWeb can check keywords or exclude parts of web pages (like counters or time). It can also highlight all changes in web pages. Both static and dynamically generated resources can be monitored. If the resource is protected, TimelyWeb will login automatically.
