

Timesheet Application (with Chat)

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

There are a number of employees in the organisation and each employee is assigned project(s). He/she might work on a single project at a stretch or might work on more than one project. At such times, it is difficult for each employee to keep track of the work he/she is doing per day and for the administrator. If the project is billed on the number of hours spent on it, then it's really difficult to tackle the accurate number of hours the assigned team is working on it. Timesheet facilitates one to enter his/her work description for each hour spent on an assigned project, which leads to accurate calculation of the hours spent.
