

Tooltip kit

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This class can be used to lookup text expressions/images on the server a page using AJAX to avoid page reloading. When a user drags the mouse over a link of a site page popup window with the expression appears. And it disappears when the user takes the mouse out from the link. The same way the class allows to add to your site context help, in-text advertising and news with descriptions by request
