Top Referers

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This script goes through the automatically generated referer_log file (generated by this script) and counts how many times your page is referred to by each URL. It then produces a table to be viewed from the web with a link to each URL that refers to you, how many times the link on that page has been followed to reach your page.
