

# Total Grid

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This is a DataGrid that performs a subtotal function. It is a component for developers that are creating their own reporting frameworks with .NET, want to leverage the DataGrid, have a requirement to display subtotals, and don't want to be bothered writing and debugging cursors on the DB. This is a DataGrid that performs a subtotal function. It is a component for developers that are creating their own reporting frameworks with .NET, want to leverage the DataGrid, have a requirement to display subtotals, and don't want to be bothered writing and debugging cursors on the DB.
