tPassword

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

tPassword is a little password protection Applet. This size is very small and runs on any browser with JDK 1.02 support. With tPassword you can define a list of users in a file and associate each user to a destination page. It is designed for personal pages without CGI and .htacces.
