Tracking Your Website's Visitors and Statistic in ASP.NET

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This tutorial lays down the basic architecture of a tracking website and highlights the technical aspects while implementing it using ASP.NET with C#. Tracking websites can record the visitor activity on any site (by pasting their tracking snippet). The recorded data can be used to generate various useful reports.
