

Translucent scroller

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This is a sleek, "translucent" scroller. In between message changes, the scroller turns semi transparent (in IE4/NS6+) as the next message slides up to cover the old. A handsome effect you may have seen in the past rendered using Flash, except this isn't. Updated for doctype bug fix plus Opera 7 compatibility.
