Tree like JavaScript menu

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This is a comact tree menu JavaScript widget for creating complex hierarchical navigational systems. It uses two modes :1.frame rewriting so you can use it even for old NS3 IE3 Opera3 browsers 2.DHTML DIV rewriting. You can use it without frames.This mode is supported for IE4+ Ns4+ NS6+ Opera7+ Mozilla1+. You can define the menu font size and color,item icons and background color for each tree menu item, pre and post html code for entire menu control. You can place a number of menu controls on one page(in DHTML mode). This menu can contain more than 1000 items and unlimited number of subfolders.
