| **Mobile Number** | {value_mobile_number} |
| **Email** | {value_email} |

This is a server-side ActiveX component that can be used in your ASP applications to generate your customizable tree structures. The tree structures are dynamically generated from text data sources or databases (via ODBC). With TreeGen, a web tree structure can take several forms including: site map, news strip, browsing the site, etc. It also supports: HTML, DHTML, Java, XML, and more.
