TS Flash Video Player is a Flash video player for web sites. The sources are included and you can create your own interface in Flash or directly with HTML and Javascript, this makes this product highly customizable in features and look and feel. There are versions available to copy and paste directly into a web page and more visual versions packaged as Dreamweaver plugins (extensions). TSVideo has been implemented using the potential of Action Script 3.0 and the improvements that Adobe Flash CS3 introduced in the media support.
