

# Turning numbers into graphs with ASP

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This tutorial presents a couple of ways to display your data in a graphical way by using charts without using server components. The first approach is using images with ASP to display bar graphs. The second approach is a Java applet that can display a more advanced graph, but depends on a Java capable browser.
