

# Two borthers: chop and chomp

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Both of these very useful textual data processing functions work fine until you forget which one of them you have used in your last script. If you know the difference you never be confused about which one you should use.
