tyBit® (patent pending) is a powerful search technology developed to enhance the end-user search experience. tyBit® ([www.tyBit.com](http://www.tyBit.com)) allows users to search the Web quickly and thoroughly by instantly submitting search queries to multiple search engines, directories and indexes, displaying all of the results in a single concise window. Users can search with tyBit® either in its Web version or the downloadable toolbar that can be accessed from a browser or from within many popular Microsoft Office programs. Within seconds of downloading tyBit® 's Search Bar, you will be searching the entire Web privately from a single interface! Since the search is performed from within the toolbar on the user's computer, tyBit® learns from the user's behavior without releasing their private information onto the Internet. tyBit® is an anonymous search combining browser acceleration with spyware protection, perfect for shopping online at [www.tyBit.com](http://www.tyBit.com).
