TYPO3 is a professional Content Management Framework. Frontend: Automatic navigation generation; Pages can be statically published to HTML files; Advanced multilevel caching and mixing of cached and dynamic content; Integration of your own PHP functions or classes; Advanced TypoScript configuration technology for building Templates; Default modules as shop, forums, poll, calendar; Multi languages; Multiple, independent websites in the same system; Support for users and groups, access restricted pages and objects. Backend: Custom tables and modules; Rich Text WYSIWYG editor; File manager; Workflow system; Internal message-system. Typo3 compares to professional commercial systems and you must allow for some time to get into the system.
