U-Upload is an FTP upload applet that runs in a web page. Powered by Unlimited FTP applet, U-Upload provides one of the fastest ways to upload files on the internet. U-Upload does not require a special server program or CGI in order to run like other upload components. It will connect to any standard FTP server, giving you full control over where files are stored. Some of the features include MacBinary support, automatic Zip, upload entire directories, and much more.
