Ultimate Contact Page

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Ultimate Contact Page makes it easy to add a professional contact page to any Wordpress website. Its features include: An AJAX contact form * Formats your address to schema.org standards, so search engines including Google, Bing and Yahoo! can index your physical address in Google Maps * Adds a Google Maps map to the page, with the ability for visitors to get directions to your location * Links to Facebook and Twitter pages * Displays opening hours in neat table (easily editable, too!), using schema.org standards * Uses a shortcode to add the contact page to any of your pages in wordpress! You might be wondering… what is Schema.org? Well here it is from the page: http://support.google.com/webmasters/bin/answer.py?hl=en&answer=1211158 Quote: schema.org is a collaboration by Google, Microsoft, and Yahoo! to improve the web by creating a structured data markup schema supported by major search engines.
