With more than 17,000 software titles and a powerful admin area, URA is the leading affiliate manager for Regnow. The best part is that you only have to install it once and URA will auto-update itself with fresh content directly from Regnow's feed. This means there's no need for maintenance. Another advantage is that you will make premium dollars from Adsense since URA comes with a build in ads system that easily permits you to place Adsense or any other ads.
