

Universal HTML5 Audio Player

| | |
|-----------------------|------------------------|
| Address | {value_address} |
| Contact Person | {value_contact_person} |
| Mobile Number | {value_mobile_number} |
| Email | {value_email} |

Compatible with iOS, Android, and Desktop Browsers. Conveniently uses Flash Player for non-HTML5 browsers when necessary. Protect your audio from being hijacked by using a beep overlay, or another overlay sound. Support for both static pages & dynamic webapps Auto fallback to Flash in Firefox if not using .ogg files. A circular progress meter displays playback position & time remaining. Easily customize the color of the progress meter. HTML5 Audio Buttons are smart, and stop playback when another button starts playmode. Set a default size, and/or use custom dimensions for each button to support multiple layouts, and designs on the same page. Easily customize the play & pause images.
