

Upgrade Director

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Upgrade Director makes managing the updates for your Perl or PHP programs extremely easy. Just setup the program, place a little piece of code in your program before anyone downloads it, and you have instant access to letting everyone know when there is an upgrade available. Also, track web sites that have your program(s) installed.
