

# Upload files using a HTML form in PHP

|                       |                        |
|-----------------------|------------------------|
| <b>Address</b>        | {value_address}        |
| <b>Contact Person</b> | {value_contact_person} |
| <b>Mobile Number</b>  | {value_mobile_number}  |
| <b>Email</b>          | {value_email}          |

This script will help you for the baics of uploading images or files to your server using a HTML form and the PHP function copy. We haven't explained form validation or file checking - We'll go into further detail on that in future tutorials. To kick things off, you'll need a HTML form.
