Uppy v1.0 allows you or your visitor to upload several files in same time on your website. This script is based on PHP / Ajax language (without any Flash or Java !), there is no limit of the number of files you can insert in the queue (except if you add some restrictions in the config file). The progression bar based on transfer time will give you the possibility to control each upload individually. A few security system are setup to keep the script in progress in case a file is not uploaded in the queue, the script will continue until the end of the list. Compatibility navigator :Internet Explorer / FireFox / Safari / Chrome / Opera. No installation, just drag the unzipped folder on the root or where you want of your server, no database, no FLASH or JAVA plugin are required. Video Demo here : <http://www.youtube.com/watch?v=vrQijaxF3-k>
