

Urchin RSS Aggregator

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Urchin is a Web based, customisable, RSS aggregator and filter. Urchin also includes code to help administrators import RSS-like data from non-RSS sources. Currently there is code to create RSS objects using regular expression based scraping of text files or SQL queries to Perl DBI sources.
