URL Tracker

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

You can select specific urls on your page to be redirected to URL Tracker which keeps track of the date, time, and what domain the user was logged on from that clicked them. This script will also work with the random image displayer script so that you can keep a tab of how many people are actually going to your sponsors from your site.
