

US Zipcode distance search

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This can be useful when trying to find retailers within a certain number of miles to a customer. The script is very useful for Dating, Online Shopping and local search engine websites. The script come with a database of all US zipcode and details to find the approximate distance. The script comes as a php class file which is well commented and explained.
