User Quota Graph

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This class allows you to supply the values of the user quota (as you might gather from the file system, imap, or your own database driven system) and output them as a nice graph, or as text. The colours of the graph are definable, and you can also change whether you have it as a flat pie chart or a 3D pie chart. This was designed to mimick the disk space graph used on Windows.
