

# Using Application variables, and introducing global.asa

|                       |                        |
|-----------------------|------------------------|
| <b>Address</b>        | {value_address}        |
| <b>Contact Person</b> | {value_contact_person} |
| <b>Mobile Number</b>  | {value_mobile_number}  |
| <b>Email</b>          | {value_email}          |

Here, you'll find a few example codes that allows you to save thousands of unnecessary database queries using Application variables.
