

Using ASP to create, edit, or delete information in a database.

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This is a set of ASP examples/tutorials that demonstrate exactly how to use ASP with a database. Topics include: Using ADO To Add A New Record, Using ADO To Update An Existing Record, Using An Update Query To Modify An Existing Record, Using Delete Statement to Delete Records, Using A Select Statement (With A Loop), and ACCESS DATABASES (DSN vs DSN-LESS).
