# Using XML Schema archetypes and XSLT style sheets to simplify your code

| | |
|---|---|
| **Address** | {value_address} |
| **Contact Person** | {value_contact_person} |
| **Mobile Number** | {value_mobile_number} |
| **Email** | {value_email} |

This column demonstrates how to use XML Schema archetyping (and style sheets) to control styling of data for various presentation modes. Ten code samples in XML, XML Schema, and XSLT show how the techniques work to reduce code bulk and simplify maintenance.
