

Using XML to Improve File-Upload Processing

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This article presents an example of multiple binary file upload for Web applications using Extensible Markup Language (XML) technology, without the typical limitation of traditional file upload processing. It describes how to use Microsoft XML Parser 3.0 (MSXML) and ActiveX Data Objects (ADO) Stream objects for a new upload strategy with several benefits. No custom ASP components are required.
