Validation (Num. or Chars)

Address   {value_address}

Contact Person   {value_contact_person}

Mobile Number   {value_mobile_number}

Email   {value_email}

Validates an input field to make sure that only a number or character is entered. If you enter a number or a letter everything you can continue on. But, entering another value like an exclamation point (!), an ampersand (&), or a dollar sign ($), you will be prompted with a warning message. It even highlights the incorrect entry field for you.
