

VBTube - YouTube Syndication for VBulletin

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Enables webmasters running VBulletin 3.6.8+ to automatically syndicate YouTube videos. Easy to install (upload 2 files and add one VBulletin template) and editable categories. Does not require any extra bandwidth or web space as all images and videos are displayed from YouTube servers directly. The script uses the YouTube GDATA API (no key required) and is encoded with IonCube Encoder (meaning bound to one domain name). Demonstration available.
