With Videoland, you can instantly turn your current website into a professional online Video Portal. Using a web browser, you and your users will be able to upload and share video online right from your existing website! Videoland 2.0 comes with many great features, including playback of all the major video formats (Flash Video, Windows Media, Real, QuickTime, MPEG,.AVI, etc.), the ability to upload movie files using your browser, embed video in HTML pages, video thumbnail creator, support for all the major video players, playlist video playback, and more. Videoland also allows you to create logins so users can manage their own movies online using your site. Videoland is an XHTML and CSS compliant website product. Installation of Videoland is as easy as uploading a folder to your server! No database setup required, no desktop software, and no registration. Requires IIS website (Windows), ASP/ASP.NET support.
