ViralDX php script is a real gem that allows you the ability to create and operate a multi level, viral marketing system from your own website. This system is created using PHP with a Mysql database, and includes all facets of the system ready for you to build your marketing website around. You can start creating your very own traffic generation website that will create a flow of thousands if not 100s of thousands of visitors to your website, products and services. This system allows for any number of levels within your matrix structure, all new members click on each displayed add to retrieve the unique code number from the members website to complete their joining procedure. Other features include administration area for member management, email all members, stats on all levels, administration banners shown on all member page headers etc...
