VirtFire

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Make your web site or even a simple HTML page more attractive with a superb effect that makes your messages fly from the fire! You are able to use virtual fire for generating words and moving words in any direction! You don't need to know Java or HTML. You just customize the applet with the visual interfaces and you get what you need.
