

# Vision Engineer Counter

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This counter program written in Perl keeps track of the number of hits made to a website. It uses file lock commands to ensure that the counter data does not get corrupted when two users simultaneously access the website. Requires Server Side Include capability.
