vLIB

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

vLIB currently includes 3 different classes. vlibTemplate: a fast, feature packed template system with a caching class and a debugging class. Supports loops, template includes, variable manipulation, template if statements and more. vlibDate: a class for manipulating and displaying dates with a date range of 0001-9999. Includes many functions for manipulating the dates, comparing the dates and displaying the dates with different formatting options. vlibMimeMail: a class for sending mime-encoded emails. Simplifies the task of sending mime-encoded emails with attachments, html text, requesting receipts, etc.
