

# Voicent Gateway PHP script for making phone calls

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

The functions included are used for making telephone calls from any computer. The call requests are sent over http to Voicent Gateway, a software program for interactive telephony applications. The gateway program can be installed on a remote machine. A FREE version of the gateway is available for download from <http://www.voicent.com/download>. call\_text: make a phone call with a text message. The text is automatically converted to speech using speech synthesis engine. call\_audio: make a phone call with a pre-recorded audio message call\_till\_confirm: set up a call-till-confirm phone escalation process, ideal for system administration staffs. (This feature is not available in the free version)
