

vs Organizer

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

vsOrganizer includes four scripts that can be used together to make a complete organizer application, much like MS Outlook. Admin access can be enabled so that guests have read-only access. Use it for your personal organizer, or share information with a group. Installation is a breeze. Just FTP and run on most servers - the script's are smart enough to detect their own environment. A setup script is included and the scripts can be easily configured through your browser.
