Develop php applications from within Visual Studio.Net 2002. This product lets you build, edit, debug and securely deploy php applications using the familiar interface of the most popular IDE in the market. Contrary to other PHP IDE products, VS.Php leverages the familiar interface of Microsoft Visual Studio.Net 2002 allowing PHP developers leverage all the features Visual Studio.Net 2002 provides. No need to learn a new IDE interface or tools.
